

Amendments to the Specification:

Replacement for the paragraphs originally set forth at page 4, lines 6 – 10 of the specification:

Fig. 9 is a fragmentary schematic pictorial illustration depicting the manner in which the cord retainer may be mounted for movement between extended and retracted positions; and

Fig. 10 is a fragmentary schematic pictorial illustration, generally similar to Fig. 9, of another embodiment of the retainer; and

Fig. 11 is a schematic illustration of a reclosable fastener.

Replacement for the paragraphs originally extending from page 6, line 18 to page 7, line 5 of the specification:

The cord retainer 32 is fixedly connected with the housing 12. A releasable fastener 42 (Fig. 11), specifically "dual lock" (trademark) reclosable fastener, is utilized to fixedly connect the cord retainer 32 with the housing 12. "Dual lock" (trademark) reclosable fastener 42 is commercially available from Minnesota Mining and Manufacturing Company (aka 3M) of Saint Paul, Minnesota. "Dual lock" (trademark) reclosable fastener has been described as polypropylene reclosable fastener which includes a rubber based pressure sensitive adhesive with 170 to 400 stems per square inch, black foam adhesive, and white polyethylene film liner. The fastener may be black and/or clear.
